About This Event
Leadership is the vital ingredient that separates outstanding organisations from the chasing pack. Visionary leaders blend strategic insight with operational excellence and personal impact to grow and scale their organisation nationally and globally. This lecture will explore what skills the modern leader needs in their role as the Engineering Sector scales for growth, change & innovation.

The presentation will cover:
- The Evolution of Leadership Thinking
- Developing Talent
- Leadership Assessment
- Strategic Implications for organisations

The Speaker

Jack held senior leadership roles with Braun AG in Ireland and Germany, Semperit in Dublin and Continental Tyres in France. As Group HR Director of CRH Plc, where he spent 17 years, his primary focus was on Talent Management and developing the next generation of leaders for the organisation. A former president of Engineers Ireland & The Irish Academy of Engineering, he contributes to programmes in Leadership and Organisational Development for the IMI and many industry organisations.
