Synopsis:

This lecture is the second in a series of four lectures by experienced professionals that will explore Asset Management and Reliability of Machinery.

The lecture will discuss:
- The important link between Asset Management and Information Management
- Why we need to move away from paper-based information management to digital information management and BIM
- BIM's potential for use in asset management post project phase

The lecture will be followed by a panel discussion on its content.

Speaker Bio:

Ralph Montague is managing partner of ArcDox, a specialist BIM (Building Information Modelling) consultancy practice based in Dublin, Ireland, providing professionally managed advice, production, support and training services to the construction and property industry. He is a member of the National BIM Council of Ireland and coordinator of the Construction IT Alliance (CITA) BIM Group, and he has represented Ireland on the Architects Council of Europe (ACE) BIM Working Group. Ralph is also the current chair of NSAI's Technical Mirror Committee on BIM, monitoring the work on European Committee for Standardization (CEN TC442) and International Organization for Standardization (ISOTC59) technical committees on BIM standards.
