

## **The Modular API Facility**

**14 Months from start of design to production**

by

Kevin McCarthy, BE MIEI  
Process Engineering Manager  
ProsCon Ltd

This presentation covers the execution of a project undertaken by ProsCon Ltd., to deliver a new production facility using modular design and build techniques starting from commencement of detailed design in August 2005 and production in October 2006.

The benefits of modular design and build verses conventional techniques for this application, together with the essential elements required from the customer / engineering company relationship to deliver a successful project under the demands of a tight schedule and the requirement for highest quality build, will be reviewed.

**Date: Tuesday, 27<sup>th</sup> February, 2007.**

**Venue: Rochestown Park Hotel**

**Time: 8.00 p.m.**
