

# CASP Update 2008 – Cork Area Strategic Plan

Presentation by: Conall Mac Aongusa, RPS  
Aiden O'Neill, RPS

The Cork Area Strategic Plan (CASP) was adopted jointly by Cork City Council and Cork County Council in 2001 to provide a framework to enable Cork to become a leading European City Region – globally competitive socially inclusive and culturally enriched.

CASP continued the legacy of long term strategic planning in Cork going back to the LUTS of the 1970s and beyond. The Cork Region and its hinterland has benefited considerably from this concerted and inclusive approach.

In 2008 the two local authorities jointly commissioned a study – CASP Update 2008 – to update the plan to deliver a significant enhancement in economic growth so that the city region can achieve its full economic and employment potential and taking account of the potential for a significant uplift, sustain the anticipated future levels of population.

This paper is being presented with the kind permission of Cork City Council and Cork County Council.
