

## Title: Duties of Engineers under the Construction Regulations

Speaker: Eamon Egan

Location: Rochestown Park Hotel, Cork

Date & Time: Wed 26<sup>th</sup> October 2011, 19:00

Eamon Egan is the Managing Director of Egan Safety Solutions ([www.egansafetyolutions.ie](http://www.egansafetyolutions.ie)). He is an Electrical Engineer and worked previously as an inspector with the Health & Safety Authority responsible for drafting legislation & safety policies as well as conducting workplace inspections.

Eamon specialises in the design and management requirements of the Safety, Health and Welfare at Work (Construction) Regulations of 2006 and has led the implementation of client, PSDP and PSCS roles in some of Ireland's flagship projects. He also currently lectures in construction safety in the Diploma in Safety, Health and Welfare at Work at University College Cork.

**About the event:** With any construction project there are a number of parties that have an interest in the project. The following have specific legal duties under the Safety, Health and Welfare at Work (Construction) Regulations 2006 (S.I. No. 504 of 2006)

- Client
- Project Supervisor Design Process
- Designers
- Project Supervisor Construction Stage
- Contractors

Eamon looks at the key duties and responsibilities of engineers under these regulations.

**Admission:** Free. All welcome.
