

# **ENGINEERS IRELAND**

## **JOINT EVENING LECTURE**

**Energy and Environment Division and Cork Region**

### **Energy Costs – Recent Trends & Future Prospects**

**Date: Tuesday 3<sup>rd</sup> Feb 09**

**Time: 20:00 (sharp)**

**Venue: Rochestown Park Hotel, Rochestown, Cork**

Energy costs and energy conservation have been topical issues in recent months and this is likely to be a continuing trend.

This is a topic of interest to everyone but of added importance to members of Engineers Ireland, particularly in the context of large industrial energy users, of which there are many in the pharmaceutical, food and manufacturing industries in the Cork area.

The lecture will cover recent trends and the future prospects for energy users in Ireland and will cover energy use issues in the industrial, commercial and domestic sectors.

Speaker – Cathal Gallagher - Bord Gáis Eireann
