Project Management
(Lecture 4 of 4)
The Future of Project Management

Date: Monday 24th October 2016
Time: 19:00 (Tea/Coffee from 18:30)
Venue: Rochestown Park Hotel, Cork
Speaker: John Kelly (Chartered Engineer), Centre for Project Management, University of Limerick

Synopsis:
The conventional perspective of projects as one off-ventures, with well-defined budgets and resources, concentrated on internal process efficiency, has limitations. A more contextual view where projects are considered open, interact with and are affected by conditions in its environment reflects more accurately the uncertain nature of projects. Project Management as a discipline has evolved to address the shortcomings of the conventional perspective, and has lead to a re-think of understanding projects in their business and social context. This presentation explores the nature of projects, the opportunities and challenges, and the prospects of project management as a profession.

Speaker Bio:

John's background is Civil Engineering and Project Management. Graduated from UCC in 1987, he gained over 15 years industry experience before joining the University of Limerick in 2002. He has worked as a design engineer and project manager for construction firms (Rush & Tompkins UK), design consultants (BSD Consultants, Perth, Atkins McCarthy and KML CarlBro, Dublin) and local authorities (Limerick City Council). This international construction industry experience in Ireland, the UK and Australia gave him insight to the design and construction management of major retail and commercial developments, large scale infrastructure projects in highways, water and wastewater. He is a chartered engineer with Engineers Ireland, has PMP certification with the Project Management Institute and completed a Masters in Project Management (M.PM) in UL in 2000. Since joining the Centre for Project Management, he has been involved in project management education, training and research across industry sectors and was appointed Director to the Centre for Project Management in 2005.
