

EI / IET JOINT EVENING LECTURE

Road Map for Smart Networks

Presented By John Shine, Managing Director, ESB Networks

The future development of Energy Networks will be critical to the delivery of global sustainability and CO2 targets. In Ireland electricity networks will play a key enabling role in the integration and penetration of renewable energy sources, deployment of distributed generation, the roll out of demand side management programmes and transport electrification. This presentation sets out ESB Networks Vision and Road Map to 2020 for making electricity networks smarter, more accessible, more flexible and more efficient, while all the time operating them cost effectively and safely.

This lecture is hosted jointly by the Institution of Engineering Technology (Irish Branch) and Engineers Ireland (Cork Region).

Date:	Tuesday 17th November, 2009
Time:	6.00 p.m. for 6.30 (Light refreshments served at 6.00 p.m.)
Venue:	Cork Institution of Technology
Room:	B263
