Advances in Transmission & Distribution Metering Solutions

A one-day interactive workshop providing the latest updates and innovations in the transmission and distribution metering world. A great opportunity to understand how other groups are applying the technology and exchange ideas with leading experts in the field.

By attending you will gain:
- Understanding latest metering solutions
- Introduction IGEM/GM/8
- Basic principles of chromatography
- Insight into gas measurement uncertainties
- Technical methods of calibration and recalibration
- Practical breakout sessions
- Open discussion sessions

Who should attend?
Meter asset managers, Meter installers, Certification bodies, Transmission and distribution engineers, Maintenance engineers, Network analysis representatives/designers, Training bodies

9th Oct 2014
09:30 - 15:30
Park Inn Cork Airport, Cork
