Date	<b>Tuesday 19<sup>th</sup> January 2021</b>
Time	7pm
Venue	Online via Zoom
Booking Details	Free Event & All Welcome Book via: <a href="https://bit.ly/399nb4D">https://bit.ly/399nb4D</a>
CPD Time	1 Hour

### About This Event

This presentation will focus on a key element of the overall Cork Lower Harbour Drainage Project, namely the Estuary Crossing HDD Project. This vital aspect of the project provided the infrastructure required to link the upgraded and expanded collection network in Cobh to that in Monkstown via trenchless installation of 2No pipelines under the River Lee estuary, and provided a fully functioning controlled collection system capable of serving the combined sewerage needs of the overall catchment area.

The presentation will cover topics such as the project background, project team, stakeholder engagement, contractual arrangements, HDD design, construction and installation.

### The Speakers

**Paul Griffin** - Project Engineer, Irish Water/ERVIA

**Ross Henderson** – Business Development Manager, O'Connor Utilities Ltd.
