**Time:** 18:30 (Tea/Coffee from 18:00)  
**Venue:** Rochestown Park Hotel  
**Speaker:** Nick Ustianowski  

**Synopsis:** The term Lean 6 Sigma combines two quality improvement approaches: Lean and Six Sigma. Lean methodologies focus on eliminating waste and streamlining processes. Six Sigma methodologies focus on improving quality and yield while reducing defects and variation. Lean sigma is used across all industries - from manufacturing to transactional to financial services to healthcare to construction to product development to supply chain to military to call centres......... Lean sigma drives continuous improvement to deliver more efficient and effective processes as well as positively influencing and delivering increased employee engagement and participation. Lean sigma is seen as the route to ensure that an organisation or business can continue to thrive even within a challenging economic market.

**Lean and Six Sigma Presentation**

- Why Lean and Six sigma? (The Benefits)  
- What is it?
